

Owner's Manual

INFORMATION FOR YOUR SAFETY!

THE FCC REGULATION WARNING (for USA)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no quarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Unauthorized changes or modification to this system can void the user's authority to operate this equipment.

CAUTION

The normal function of the product may be disturbed by Strong Electro Magnetic Interference. If so, simply reset the product to resume normal operation by following the owner's manual. In case the function could not resume, please use the product in other location.

PRECAUTIONS

PLEASE READ CAREFULLY BEFORE PROCEEDING

Please keep this manual in a safe place for future reference.

Power Supply

Please connect the designated Power Cord to an AC outlet of the correct voltage.

Do not connect it to an AC outlet of voltage other than that for which your instrument is intended.

Unplug the Power Cord when not using the instrument, or during electrical storms.

Connections

Before connecting the instrument to other devices, turn off the power to all units. This will help prevent malfunction and / or damage to other devices.

Location

Do not expose the instrument to the following conditions to avoid deformation, discoloration, or more serious damage:

- Direct sunlight
- Extreme temperature or humidity
- Excessive dusty or dirty location
- Strong vibrations or shocks
- Close to magnetic fields

Interference with other electrical devices

Radios and televisions placed nearby may experience reception interference. Operate this unit at a suitable distance from radios and televisions.

Cleaning

Clean only with a soft, dry cloth.

Do not use paint thinners, solvents, cleaning fluids, or chemical-impregnated wiping cloths.

Do not apply excessive force to the switches or controls.

Do not let paper, metallic, or other objects into the instrument. If this happens, remove the electric plug from the outlet. Then have the instrument inspected by qualified service personnel.

Disconnect all cables before moving the instrument.

This section contains information about setting up your instrument and preparing to play. Please read through this section carefully before turning the power on.

Setup Guide

1. Before proceeding to assemble the stand, check that all the parts listed below are included:

Α	Pedal component
В	Right leg component
С	Left leg component
D	Rear leg component
Е	Piano body
F	Washer
G	M 12X45mm hexagonal bolt
Н	Ø 3x15mm screw
-	Copper pole
J	Wrench

- 2. Follow the steps below to assemble the stand. You will need a Phillip's screwdriver (not supplied).
- A. Reverse the carton upside down and then place it horizontally on the floor.

 (Make sure the bottom surface is on the upside.) Then open the box, and remove the foams which are used to protect the piano body, as shown in the picture.

B. Put the Left leg component (C) on the left side of the Piano body (E). Then align the sunken hole on the Leg component to that on the Piano body.

Place a washer into this sunken hole, then use the Wrench (J) to securely tighten the Hexagonal bolt (G)(2 on each side) in clockwise direction, as shown in the picture. (Make sure the direction of the components is correct before screwing)

Affix the Right leg component (B) and Rear leg component (D) to the Piano body (E) in the same way.

- a. Put a Washer into the sunken hole on the leg component.
- b. Put a hexagonal bolt into the sunken hole.
- c. Use the Wrench to tighten the bolt in clockwise direction.

C. Use Screws (H) to affix the two Copper poles (I) onto the back of the Pedal component (A), as shown in the picture. (Make sure the direction of the components is correct before screwing.)

D. Carefully reverse the Pedal component, then affix the Pedal component and the Copper poles to the Piano body with Hexagonal bolts (G).

E. Set the piano upright, as shown in the picture. Carefully reverse the piano. Avoid damaging any legs or the pedal component.

Panel & Display Description

Front Panel

1. [VOLUME] Knob

Adjust the master volume.

2. [BRILLIANCE] Knob

Adjust the brilliance.

3. [REC] Button

USB flash drive inserted: press the button to enter Audio Recording.

USB flash drive not inserted: press the button to enter MIDI Recording.

Press and hold the button to enter the recording setting menu.

4. [TEMPO +/-] Buttons

Press to edit the tempo value.

5. STYLE Select Buttons

Directly set a preset style. Press a button once to select the first preset style, press it again to select the second preset style.

6. [A.B.C.] Button

Press it to turn the A.B.C. function on or off. Press and hold it to enter the Chord setting menu.

7. [FADE IN/OUT] Button

Press it to turn the Fade In or Fade Out on or off.
Press and hold it to enter the Fade Time setting menu.

8. [INTRO/ENDING 1] Button

Play the Intro or Ending pattern 1.

9. [INTRO/ENDING 2] Button

In style mode: play the Intro or Ending pattern 2. In song mode: mute/activate the left hand part.

10. [MAIN A] Button

In style mode: play the Main pattern A.
In song mode: mute/activate the right hand part.

11. [MAIN B] Button

In style mode: play the Main pattern B.
In song mode: play the current song in a loop.

12. [MAIN C] Button

In style mode: play the Main pattern C. In song mode: play all songs in a loop.

13. [MAIN D] Button

In style mode: play the Main pattern D.
In song mode: rewind the song playback.
In Bluetooth mode: play the previous Bluetooth song.

14. [SYNC STOP] Button

In style mode: turn the Sync Stop function on or off. In song mode: fast forward the song playback. In Bluetooth mode: play the next Bluetooth song.

15. [SYNC START] Button

In style mode: turn the Sync Start function on or off. In song mode: pause the song playback. In Bluetooth mode: pause playing the Bluetooth song.

16. [START/STOP] Button

Start or stop playing a song or a style. Start or stop playing a Bluetooth song.

17. [METRO] Button

Press it to turn the Metronome on or off.
Press and hold it to enter the Metronome setting menu.

18. [FUNCTION] Button

Press it to enter the Function menu.

19. [DEMO] Button

Press it to enter Demo mode.

20. [MIXER] Button

Press it to enter the Mixer menu.

Panel & Display Description

21. [STYLE] Button

Press it to enter Style mode.

22. [USB] Button

Press it to enter the USB Play menu. Press and hold it to enter the USB menu.

23. [VOICE] Button

Press it to enter Voice mode.

24. [SONG/] Button

When Bluetooth is disabled, press it to enter Song mode. When Bluetooth is connected, press it once to enter Bluetooth mode, press it again to switch to Song mode.

25. Data Dial

Adjust the parameters.

26. [+/YES] Button

Increase the value. Press [+/YES] and [-/NO] together to restore default settings.

27. [-/NO] Button

Decrease the value. Press [+/YES] and [-/NO] together to restore default settings.

28. [BANK] Button

Select a memory bank.

29. [FREEZE] Button

Press it to turn the Freeze function on or off.

Press and hold it to enter the Freeze setting menu.

30. [STORE] Button

Save current panel settings to one of the memories. Press [STORE] and [M1] together to save the settings to M1.

31. VOICE Select Buttons

Directly select a preset voice. Press a button once to select the first preset voice, press it again to select the second preset voice.

32. [M1]-[M6] Buttons

In memory mode: recall panel settings from one of the memories. In O.T.S. mode: recall voice settings that match the current style.

33. [O.T.S.] Button

Press it to turn the One Touch Setting function on or off.

34. [DUAL] Button

Press it to turn the Dual function on or off.

35. [PIANO] Button

Press it to enter Piano Mode.

36. [LOWER] Button

Press it to turn the Lower function Press and hold it to enter the Split Point setting menu.

37. [TWINOVA] Button

Press it to turn the Twinova function on or off. Press and hold it to enter the Twinova Split setting menu.

38. [HARMONY] Button

Press it to turn the Harmony function on or off. Press and hold it to enter the Harmony setting menu.

39. [TRANSPOSE +/-] Buttons

Adjust the transpose value.

40. [DSP] Button

Press it to turn the DSP effect on Press and hold it to enter the DSP

setting menu.

Connections

1. PEDAL JACK

Connect the pedal component.

2. MIDI OUT, MIDI IN, MIDI THRU Jacks

Use a standard MIDI cable to connect the MIDI OUT jack of the instrument to the MIDI IN lack of an external device. The instrument will transmit MIDI messages to the external device and work as a MIDI controller.

Use a standard MIDI cable to connect the MIDI IN jack of the instrument to the MIDI OUT jack of an external device. The instrument will receive MIDI messages from the external device and work as a sound source.

Use a standard MIDI cable to connect the MIDI THRU jack of the instrument to the MIDI IN jack of an external device. The instrument will relay the MIDI messages it has received from its MIDI IN to the next device.

3. USB Jack

Use a standard USB cable to connect the USB jack of the instrument to the USB port of a computer. With USB, you can save a keyboard performance to the computer or use the instrument to play back music played on the computer. Note:

Do not set the USB MIDI device to be both input and output simultaneously when configuring the software on your computer. Otherwise, the sound will be overlapped when playing the keyboard.

4. MIC Jack

Before connecting or disconnecting a microphone, set the master volume level to minimum. Plug the microphone into the MIC jack, then adjust the master volume to an appropriate level.

Note:

Please unplug the microphone when it is not in use.

5. MIC Volume Knob

Rotate it to adjust the input volume of the microphone.

6. AUX IN Jack

The AUX IN jacks receive audio signals from an external audio source such as an MP3 or a CD player. Connect the AUX IN jacks of the instrument to the OUTPUT jack of an MP3/CD player. The instrument's speakers will play the music transmitted from the external player, and you can play along.

7. AUX OUT Jack

The AUX OUT jacks deliver the output of the instrument to external audio equipment such as a keyboard amplifier, stereo sound system, mixing console, or recording interface. Connect the AUX OUT jacks of the instrument to the INPUT jack of the external audio equipment. Use the R and L jacks for stereo output or just the L jack for mono output.

- 1. Turn off the power to all devices before connecting or disconnecting external equipment.
- 2. To avoid damaging the speakers, set the master volume level to minimum before turning on the power.

8. AC POWER INLET

Connect the AC power cable to this inlet.

Connections

9. PHONES Jack

Plug a pair of standard stereo headphones into the PHONES jack for private practice or late-night playing. When headphones are connected, the internal speakers will be muted, and the sound can only be heard from the headphones.

Note:

To avoid the risk of hearing loss, do not use headphones at high volume level for a long period of time.

10. USB Port

Connect a USB flash drive to the instrument to save the data you've created to the USB flash drive. You can also load files from a USB flash drive to the instrument, or use the instrument to play back files saved on USB flash drive. **Note:**

To avoid errors or damaging the USB flash drive, do not remove it when reading or writing is in progress.

Power Supply

- 2. Connect the AC power cable to AC power supply jack on the rear panel.
- 3. Plug the AC power cable into an appropriate AC outlet.
- 4. Press the [POWER] switch. The LCD will light up and display the welcome interface, indicating the instrument is powered on.
- 5. When you are ready to turn the instrument off, press and hold the [POWER] switch for a second. The LCD light will turn off.

Notes:

- 1. In order to save energy, the instrument will automatically shut down after 30 minutes when not in use. (see Auto Power Off).
- 2. For your safety, please unplug the instrument when it is not in use or during a thunderstorm.

Adjusting the Master Volume

Rotate the [VOLUME] knob clockwise to increase the master volume or counter-clockwise to decrease it. Adjust to set the desired volume level.

If the speakers do not produce sound, check if the master volume is set too low or if headphones are plugged into the PHONES jack.

VOLUME

Adjusting the Brilliance

Use the [BRILLIANCE] knob to adjust the overall brilliance level. The brilliance is set to medium by default. Rotate the knob clockwise to brighten the sound, or counter-clockwise to mellow the sound.

Playing the Demos

The instrument features several professional demos. Please refer to the Demo List for details.

- 1. Start playing the demo. Press the [DEMO] button to enter Demo mode and start playing the demos in a continuous loop. The LCD shows the current demo number and name.
- 2. Select a demo. Use the data dial or [+/Yes]/[-/No] buttons to select a desired demo.
- 3. Stop playing the demo. Press the [START/STOP] button to stop playing and exit Demo mode.

During demo playback, playing the keyboard will not produce sound.

Playing the Voices

The instrument features a variety of realistic voices. Please refer to the *Voice List* for details.

Playing a Voice

1. Enter the voice mode.

Press the [VOICE] button or one of the VOICE select buttons to enter Voice mode. The "R1" indicator appears and the LCD shows the current voice number and name.

2. Select a voice to play.

Use the data dial or [+/Yes]/[-/No] buttons to select a desired voice. You can also use the VOICE select buttons to select a preset voice.

3. Play the selected voice.

Play the keyboard to use the selected voice for performance.

Playing Two Voices Simultaneously

The Dual function allows two different voices to be layered together, creating a more full and rich sound. Turn this function on and select a voice for the dual voice "R2".

1. Turn on the dual function.

Press the [DUAL] button to turn on the Dual function. The "R2" indicator appears and the LCD shows the current dual voice number and name.

2. Select a dual voice.

Use the data dial or [+/Yes]/[-/No] buttons to select a dual voice. You can also use the VOICE select buttons to select a preset voice.

3. Play the voices

Play the keyboard and you will hear two different voices playing together, just like two different instruments being played at the same time.

4. Turn off the dual function.

Press the [DUAL] button again to turn off the Dual function.

Playing the Voices

Playing Different Voices with Both Hands

The Lower function splits the keyboard into two areas so as to create different voices for each of your hands. The left hand voice is the lower voice "L".

1. Turn on the lower function.

Press the [LOWER] button to turn on the Lower function. The "L" indicator appears. The LCD shows the current lower voice number and name.

2. Select a lower voice.

Use the data dial or [+/Yes]/[-/No] buttons to select a lower voice. You can also use the VOICE select buttons to select a preset voice.

3. Play the voices.

Play the keyboard with both hands and you will hear two different voices from the left and right hand areas.

4. Set the lower split.

Press and hold the [LOWER] buttons to enter the lower split setting menu, then use the [+/Yes]/[-/No] buttons or press a key on the keyboard to assign the lower split.

Press [+/YES] and [-/NO] at the same time to restore the default lower

5. Turn off the lower function.

Press the [LOWER] button again to turn off the lower function.

Switch between Voice R1 / R2 / L

The voice "R1" is turned on by default, and cannot be turned off. The dual voice "R2" and lower voice "L" can be turned on/off as desired. In voice mode, when the R1, R2, and L voices are all in use, you can press the [VOICE] button repeatedly to switch between different voice layers.

Lower Split

The key that splits the keyboard into the left and right hand areas is called "Lower Split". The default lower split is F#3 (34), however, you can assign it to any other key. Please refer to the Function Menu for details.

Notes:

- 1. When the Lower and Dual functions are in use, only the right hand area will play the dual voices.
- 2. You can adjust the volume for voice R1/ R2/ L separately in the Mixer. Please refer to Mixer for details.

Playing the Voices

Transpose

The transpose function allows the overall pitch of the instrument to be transposed up or down by a maximum of one octave in semitone steps.

- Enter the transpose setting interface.
 Press the [TRANSPOSE+] / [TRANSPOSE-] buttons to edit the transpose setting. The LCD shows the current transpose value.
- 2. Adjust the transpose value. Use the data dial, [+/Yes]/ [-/No] buttons or [TRANSPOSE+] / [TRANSPOSE-] to adjust the transpose value.
- Reset the transpose to default.
 Press the [TRANSPOSE+] and [TRANSPOSE-] buttons at the same time to reset the value to default.

Notes:

- 1. For example, if you set the transpose value to -05 or 007, you will hear "G" pitch when playing the "C" keys.
- Transpose setting applies to the accompaniment and the entire keyboard voice.

Voice R1	Piano	o 1	
(+ 1) 4/4	00 1:0 1	096	MEMORY 1-1

Piano Mode

Piano Mode is specially designed for piano players. It recreates the voice and touch of a real acoustic piano. By pressing the [PIANO] button, the instrument replicates a concert grand voice. All parameters become optimized for concert piano performance.

Press the [PIANO] button to enter or exit Piano Mode.

Note:

In Piano Mode, the Dual and Lower functions will not be available.

Concert Grand						
	TRANS	SIGNATURE 4/4	00 1:0 1	096	MEMORY 1-1	

17

Twinova

The Twinova function splits the keyboard into two areas with the same pitch and voice, for the convenience of playing together with a friend or instructor.

Turn on the Twinova function.
 Press the [TWINOVA] button to turn on the function. The default split
point is E3.

2. Set the Split Point for Twinova. Press and hold [TWINOVA] to enter the setting menu. Use the data dial to select "TWINOVA SPLIT", then use the [+/YES]/[-/NO] buttons to assign the split point. You can also tap a key on the keyboard to

3. Set the Octave for Twinova. Press and hold [TWINOVA] to enter the setting menu. Use the data dial to select "TWINOVA OCTAVE", then use the [+/Yes]/[-/No] buttons to adjust the octave range from -2 to +2.

Pedal Function in Twinova

assign the split point to that key.

Left Pedal: notes played on the left hand area will have longer sustain. **Middle Pedal:** notes played on both areas will have longer sustain. **Right Pedal:** notes played on the right hand area will have longer sustain.

Note:

In Twinova mode, both the Dual and Lower functions will not be available.

The auto accompaniment function puts a full backing band at your fingertips. All you have to do is to play chords with your left hand, and the accompaniment will automatically play along, following the chords you play. With auto accompaniment, even a solo performer can enjoy the experience of playing with a full band or orchestra.

The instrument features a variety of styles. Please refer to the Style List

Playing Only the Rhythm Tracks

- 1. Enter the style mode. Press the [STYLE] button to enter Style mode. The LCD shows the current style number and name.
- 2. Select a style to play. Use the data dial or [+/Yes]/[-/No] buttons to select a desired style. You can also use the STYLE select buttons to select a preset style.
- 3. Start playing auto accompaniment of the rhythm tracks. Press the [START/STOP] button to start playing the rhythm tracks. Alternatively, press the [SYNC START] button, then play the keyboard to start rhythm playback.

Playing All Tracks of a Style

During rhythm playback, if you turn on the chord mode and then play a chord on the keyboard, it will start the chord part as well.

In chord mode, you can play chords in the following ways: Fingered, Multi-finger, Bass Invert and Full Range, Except for Full Range, the other three will divide the keyboard into two areas (same as in the Lower function).

Chord Type	Description		
Fingered	Automatically detects Single Finger and Multi		
	Finger chords.		
Multi Finger	Detects only Multi Fingerchords.		
Bass Invert	Detects Multi Finger chord inversion of bass track.		
Full Range	Detects Multi Finger chords over the entire		
	keyboard range and supports Bass Invert.		

1. Turn on the A.B.C. function.

Press the [A.B.C.] button to turn on the A.B.C. Function. The LED button lights up. Press the button repeatedly to switch between "A.B.C." \rightarrow "FULL RANGE" \rightarrow "OFF".

To select a desired way to play chords, press and hold the [A.B.C.] button to enter the setting menu, then use the [+/YES]/[-/NO] buttons to select a chord type.

2. Start playing auto accompaniment of all tracks. Press the [SYNC START] button to turn on the Sync Start function. The LED button lights up. When you play a chord in the chord section, it will start the auto accompaniment of all tracks. When you play a different chord, the accompaniment will change along with you.

Alternatively, press the [START/STOP] button to start rhythm playback. Then play a chord in the chord section, and the chord part will start as well.

]	Fun	c CI	HOR	D	Fin	gered
		TRANS	SKSNATURE 4/4	00 1:0 1	0 78	MEMORY
			A.B.C.			

Accompaniment Variations

Specially created variation patterns can be added into the accompaniment, making your performance more professional and personalized.

INTRO

The Intro is the opening section of a song. When the Intro pattern is finished, it will automatically shift to the selected Main section. The length of the Intro section differs depending on the selected style.

MAIN

The Main is the principal section of a song. It will play and repeat the Main pattern until another section's button is pressed.

FILL IN

The Fill-in will automatically add a fill to your performance. When the Fill-in pattern is finished, it will shift to the related Main section.

ENDING

The Ending is the ending section of a song. When the Ending pattern is finished, the accompaniment will stop as well.

The length of the Ending section differs depending on the selected style.

Note:

During style playback, if you press and hold one of the MAIN [A]-[D] buttons, the Fill-in pattern will repeat until the button is released. Playback will then switch to the related Main section.

Chord Basics

A chord, in music, is a harmonic set of three or more notes that are heard simultaneously. The most common type of chord is a triad. A triad is a set of three notes that can be stacked in thirds. When arranged this way, the triad's notes, from lowest pitched to highest, are called: the Root, the Third, and the Fifth.

Triad Type

The basic triad types are as follows:

Major Triad	A root with a major third added above and a perfect fifth
	constitutes a "Major Triad".
Minor Triad	A root with a minor third added above and a perfect fifth
	constitutes a "Minor Triad".
Augmented	A root with a major third added above and an augment-
Triad	ed fifth constitutes an "Augmented Triad".
Diminished	A root with a minor third added above and a diminished
Triad	fifth constitutes a "Diminished Triad".

Chord Inversion

When a chord's root is not the lowest note in the triad, it is called an inversion chord. When the root note is the lowest note, it is called a root-position chord. If we put the Third and Fifth in the root position, it forms an "Inversion", so it is called an "Inverted Chord". A major triad and its inversion are illustrated on the right.

Chord Name

The chord name consists of two parts: Chord root and Chord type.

Diminished Triad Augmented Triad

Root Position First Inversion Second Inversion

Single Finger

Single-finger makes it easy to produce major, seventh, minor and minor seventh chords by pressing a minimum number of keys on the auto accompaniment section.

Multi-finger

Multi-finger allows you to play chords in normal fingering. Try playing the 32 types of C chords listed on the right.

Full Range

In Full Range mode, it detects chords played in normal fingering (Multi-finger) over the entire keyboard range.

Adjusting the Tempo

Each style is preset with a default or standard tempo, but you can change it as needed.

1. Adjust the tempo.

Press the [TEMPO+]/[TEMPO-] buttons to edit the tempo setting. The tempo value will flash on the LCD. Use the data dial or [+/YES]/[-/NO] buttons to change the value.

2. Reset the tempo to default.

When the tempo value is flashing, press the [+/YES] and [-/NO] buttons at the same time to reset the tempo to default.

Note:

When style stops, changing the style will automatically reset the tempo. However, changing the style during style playback will not result in tempo change.

One Touch Setting

When One Touch Setting is switched on, you can instantly recall all auto accompaniment related settings including voice selection and digital effects, all with the single touch of a button.

- Turn on the One Touch Setting function.
 Press the [O.T.S.] button to turn on the function. The "O.T.S" indicator lights up and the A.B.C. function will be turned on.
- Recall the settings in O.T.S. mode.
 Press one of the [M1] [M4] buttons. Various panel settings (including voice and effects) that match the current style will be recalled instantly. Each style has 4 preset settings.

Parameters in One Touch Setting:

Part on/off, voice number, voice volume, voice octave setting, voice reverb level, voice chorus level, voice pan.

Note:

In O.T.S. mode, the Performance Memory is not available.

Metronome

The metronome provides a steady beat to help you practice at a preset tempo.

- Turn on the metronome.
 Press the [METRO] button to turn on the metronome. Beats on the LCD will flash in sync with the metronome sound.
- Turn off the metronome.Press the [METRO] button again to turn off the metronome.

Notes

- If you turn on the metronome during style playback, the metronome sound will start from the next beat and its time signature will match the current style.
- 2. In MIDI Recording, if you turn on the metronome, the metronome sound will not be recorded.
- In Audio Recording, if you turn on the metronome, the metronome sound will be recorded.

Metronome Beat

Press and hold the [METRO] button to enter the setting menu, then use the [+/YES]/[-/NO] buttons to change the metronome beat.

Phrase 2 volume	PHRASE2 VOL:	XXX	0 - 32

DSP Effect

The DSP effects will add ambiance and depth to your performance in a variety of ways. They can be set to simulate sound from a real environment, making your tone more crystal and strong, or even give you distortion for a rougher edge. Experiment with the various effects to find the ones that work best for you.

Turn the DSP Effect on or off.

The DSP effect is turned on by default. You can press the [DSP] button to turn the function on or off.

Set the DSP Effect.

- 1. Press and hold the [DSP] button to enter the DSP settings menu.
- 2. Use the data dial to select a parameter.
- 3. Use the [+/YES]/ [-/NO] buttons to change the settings of the selected parameter.

DSP effect parameters and their ranges:

Note:

There may be a slight pause in the sound if you switch the DSP effect on/off while style or song is playing.

Harmony

The harmony function will automatically add harmony effect to the notes you play in the right hand area, enriching your performance with more harmonic expression.

Playing with Harmony

- Press the [HARMONY] button to turn on the function. The button LED lights up.
- Turn on the A.B.C. function, then play a chord in the left hand area. When you play in the right hand area, it will add harmony effect to the notes you play.
- Press the [HARMONY] button again to turn off the function. The LED light turns off.

- 1. Press and hold the [HARMONY] button to enter the settings menu.
- 2. Use the [+/YES]/[-/NO] buttons to change the harmony type.

Notes:

Harmony type "1+5" and "octave" are always available, but the rest will not respond until you turn on the A.B.C. function and then play a chord in the chord section.

Freeze

When Freeze function is in use, the selected parameter setting will remain unchanged when a performance memory is recalled.

- 1. In the function menu, use the data dial to select "FREEZE".
- 2. Use the [+/YES]/[-/NO] buttons to select a parameter.

Note:

The setting will be usable only when Freeze function is in use.

Metronome Beat

- 1. In the function menu, use the data dial to select "METRO".
- 2. Use the [+/YES]/[-/NO] buttons to change the Beat.

Fade Time

Set the time length (in seconds) for Fade In/Out.

- 1. In the function menu, use the data dial to select "FADE TIME".
- 2. Use the [+/YES]/[-/NO] buttons to change the time setting.

MIDI Out Channel

Set the MIDI OUT channel for Voice R1.

- 1. In the function menu, use the data dial to select "MIDI OUT CH".
- 2. Use the [+/YES]/[-/NO] buttons to change the MIDI Out channel.

Note:

Your setting will be automatically saved when you press [POWER] to turn off the instrument.

Song Looping

You can play back songs in the following ways: looping all songs, looping a single song, or no looping (looping off).

- 1. In the function menu, use the data dial to select "SONG LOOP".
- 2. Use the [+/YES]/[-/NO] buttons to change the setting.

Your setting will be automatically saved when you press [POWER] to turn off the instrument.

Auto Power Off

The instrument will automatically shut down after 30 minutes of inactivity, but you can disable this function or change the time setting.

- 1. In the function menu, use the data dial to select "POWER OFF".
- 2. Use the [+/YES]/[-/NO] buttons to change the time setting.

Note:

Your setting will be automatically saved when you press [POWER] to turn off the instrument.

Song Recording

You can record your performance in two ways: MIDI recording and Audio recording.

MIDI Recording

In MIDI recording, you can record and save your keyboard performance as a user song on the instrument. You can then play it back and save it to a USB flash drive.

Prepare Recording

 Press the [REC] button to enter recording standby mode. The Record button LED and the "REC" indicator will blink.

Note.

If a USB flash drive has been inserted, press and hold the [REC] button to enter the Recording settings menu, then set the Record Type to "MIDI". You can select to save the MIDI recording to either the internal flash memory or the connected USB flash drive. Please refer to *Recording Settings* for details.

After configuring the settings, press the [REC] button to enter recording standby mode.

- In recording standby mode, you can set the instrument voice, song style, tempo and so on.
- In recording standby mode, press the [REC] button again to exit recording.

Start Recording

In recording standby mode, press the [START/STOP] button or simply play the keyboard to start recording. The [REC] button LED and the "REC" indicator stop blinking and stay lit.

Alternatively, you can turn on the Sync Start function, then play the keyboard to start recording.

Stop Recording

- During recording, press the [REC] button to stop recording. The Record button LED and the "REC" indicator will turn off.
- If the memory gets full during recording, recording will stop and be saved automatically.

Play back Recording

- During recording, if you press the [REC] button to stop recording, it will enter Song mode and show the recorded song. Press the [START/STOP] button to play back the user song.
- 2. In standby mode, press the [SONG] button to enter Song mode, then use the [+/YES]/[-/NO] buttons to select the user song. Press the [START/STOP] button to play back the song.

Recording Settings

- 1. Press and hold the [REC] button to enter the Recording settings menu.
- 2. Use the data dial to select a parameter.
- 3. Use the [+/YES]/ [-/NO] buttons to change the settings.
- After configuring the settings, follow the normal procedures to enter Recording mode.

Saving the MIDI Recording To	MIDI Save To:	XXX	Internal Flash, USB Flash

Note:

- 1. The settings of the first and the last items above cannot be changed until a USB flash drive is inserted. Please refer to Connecting USB Flash Drive for details.
- 2. If you have used the DSP effects during MIDI recording, when you play back the MIDI file, the preset DSP effects for voice R1/R2/L will be disabled and the relevant DSP Types will be set to OFF and cannot be changed. The DSP effects for the voice layers will work again only when you pause, stop or exit MIDI playback.
- 3. If you use channel 4 8 for recording, connect an external MIDI keyboard or other MIDI device via either the USB jack or the MIDI jack, and then set the device's MIDI Out channels accordingly.

Audio Recording

Audio recording will record your performance and save it to a USB flash drive as an MP3 file. During recording, the sounds and effects you hear from the instrument will all be recorded.

- 1. Connect a USB flash drive to the instrument, then wait until the USB indicator appears on the LCD.
- 2. Press the [REC] button to start recording. The Record button LED and "REC" indicator will light up.

Note:

If you want to switch to MIDI recording, press and hold the [REC] button to enter the Recording settings menu, then set the Record Type to "MIDI". Please refer to Recording Settings for details.

- 3. During recording, you can play back style accompaniment, play the keyboard, play back songs or demos, play back music from the AUX IN jack, and sing through a microphone. All these sounds will be recorded.
- 4. During recording, press the [REC] button to stop recording. The recording button LED and the "REC" indicator will turn off.
- 5. The recorded song will be automatically saved as "AudioRec XXX". Press the [START/STOP] button to play back the song.

Note:

Do not remove the USB flash drive or turn off the power when song saving is in progress, otherwise it may cause damage to the audio files and the USB flash drive.

A USB flash drive in FAT32 format supports up to 512 files under its root directory. Exceeding this limit will make it unable to save or record to the USB flash drive.

Playing

- 1. Press the [USB] button to enter the USB Play menu. The LCD shows all MIDI and MP3 songs under the root directory of the USB flash drive.
- 2. Use the data dial or [+/YES]/[-/NO] buttons to select a song.
- 3. Press the [START/STOP] button to start playback. You can set to loop play a single song or all songs. Please refer to the Function Menu for details.
- 4. Press the [START/STOP] button again to stop playback.

Saving

- 1. Press and hold the [USB] button to enter the USB menu. Use the data dial to select "Save MIDI".
- 2. Press [+/YES] to save the user song to the root directory of the USB flash drive. The file will be saved as "UserSong00X_NUB.MIDI". If the user song is empty, the LCD will prompt "NoFile!"
- 3. After saving, the LCD will prompt "User song save successful!", then return to the USB menu.

File Name Description:

"UserSong00X" is the user song name and number (corresponds to the user song on the instrument).

"NUB" is the track number of the saved song (001~512).

Loading

- 1. Press and hold the [USB] button to enter the USB menu. Use the data dial to select "Load MIDI".
- 2. Press [+/YES]. The LCD will show all MIDI files (*.mid) under the root directory. Use the data dial to select one.
- 3. Press the [+/YES] button. The LCD will prompt "Load MIDI Successful!". If the user song on the instrument is not empty, the LCD will prompt "Over-write the User Song?" Press the [+/YES] button to confirm loading or press [-/NO] to cancel.
- 4. After loading, the LCD will return to the USB menu.

This operation will overwrite the previous user song on the instrument.

Formatting

- 1. Press and hold the [USB] button to enter the USB menu. Use the data dial to select "Format USB".
- Press [+/YES]. The LCD will prompt "Format USB Flash Drive?".
- 3. Press [+/YES] to format the flash drive or press [-/NO] to cancel.
- **4.** After formatting, it will return to the USB menu.

Notes:

- 1. Formatting will delete all data on the USB flash drive!
- 2. It may take several minutes to format a USB flash drive of large capacity.

The MIDI function will expand your musical possibilities.

What's MIDI?

MIDI (short for Musical Instrument Digital Interface) allows a wide variety of electronic musical instruments, computers and other related devices to connect and communicate with one another. MIDI carries event messages that specify notation, pitch and velocity, controls signals for parameters such as volume, vibrato, audio panning, and programs change information to change the voice selections.

The instrument can output real-time playback information via MIDI messages and control external MIDI devices. The instrument can also accept incoming MIDI messages and generate sound accordingly.

Troubleshooting

Problem	Possible Cause and Solution
The speakers produce a pop sound whenever the power is turned ON/OFF.	This is normal and is no cause for alarm.
	Check if the master volume is set too low.
Speakers do not produce sound when the keyboard is played.	Check if headphones are plugged into the PHONES jack. Check if the R1/R2/L1 voice volume is set too low (in the Mixer).
There is noise when I use a mobile phone.	Using a mobile phone in close proximity to the instrument may produce interference. To prevent this, turn off the mobile phone or keep it away from the instrument when in use.
The auto accompaniment does not play back even when Sync is in standby and a key is pressed.	You may be playing keys in the right hand range of the keyboard. To start the accompaniment with Sync Start, make sure to play keys in the left-hand range.
Certain notes seem to be in the wrong pitch.	Make sure that the tune value is set to 0. Hold down the [+/YES] and [-/NO] buttons and turn on the power to restore factory settings.
When connecting to computer, the instrument cannot be recognized.	Check if the USB cable is firmly connected. Try connecting another USB port on the computer. This instrument is plug and play and should work without installing a driver.
The pedal does not respond.	Check if the pedal cable is firmly connected.
It cannot read/save to the USB flash drive.	Make sure your USB flash drive is in FAT32 format and not multi-partitioned.
It shuts down after a period of time.	The auto power off function will turn off the instrument after a preset period of time when the instrument is not in use. You can adjust the auto-off function in the Function Menu.

Specifications

Keyboard & Display	
Keyboard	88 Graded Hammer-Action Keys with Triple Sensors
Touch Response	6 types, Off
